Review Heap Size Modifier Activation Code: Our Rating: Heap Size Modifier is a software application, built in Java, which provides users with a simple means of adjusting the heap size of a selected JAR item. The perks of a portable app You can skip the installation process, as this program is portable. This means that it is not going to add any new items to the Windows registry and hard drive without your approval (as installers usually do), and it is not going to leave any kind of traces behind after its removal from the disk. It is also important to mention here that you can take Heap Size Modifier anywhere with you and run it on any PC on the fly, by simply moving the program files to a USB thumb drive and clicking the EXE. Simple-to-handle interface The interface you come across can only be described as plain and simple, as it encloses a small window, a button and a few boxes. It becomes quite clear that all types of users, regardless of their experience level, can work with it. Changing parameters with ease This utility enables you to temporarily modify the maximum and minimum heap size of a selected JAR file, by simply inputting the values to the appropriate boxes. As a result, the specified item is going to be launched with the newly applied parameters. The “drag and drop” function is not supported, which means that you can only upload items with the help of the integrated file browser. Conclusion To wrap it up, Heap Size Modifier is a pretty small, yet efficient piece of software when it comes to changing the heap size of JAR file. It is dedicated to all types of users due to its overall simplicity, it does not hinder the computer’s performance and our tests did not reveal bugs or errors.

Q: how to show private facebook data of my friends in my page using facebook graph api I want to show the private data of my friends in my page. I did some search and found the Graph User data on their timeline, but I could only get the data of public timeline. I only found methods like this:

```
FB.api( '/me/friends', { fields: 'id, name, pic_big, pic_small' }, function(response) {
    console.log(response); });
```

Switches the JAR heap size. A simple, yet powerful tool for adjusting the heap size of a selected JAR. What are your thoughts about this program?No Indian constitutional guarantee of food, water, health care or even shelter for the poor may mean that many of them must be expelled from their homes, the president told journalists on Friday in his first interaction with the global media since assuming office. "We have made the case that the government, within limits, has a duty to protect all the poorest people. We are not saying that the state has unlimited resources, or that it should spend every rupee on every poor person. But we do say that the poorest among us, who have no resources of their own, have a right to be protected, and this government will not allow the poorest among us to be left to fend for themselves," said Mr. Modi, who said he had already held "many informal talks" with community leaders over how the government could ensure that every poor person had food, healthcare and shelter. "The discussions are going on at the same time as discussions on the economy, the need for inclusive growth," he said. "We have to strike a balance." Mr. Modi had been expected to emphasise his message of development and social inclusion at the United Nations on

Tuesday, but the protests that had preceded the meeting forced him to postpone it. He came under a barrage of criticism and even threats from the demonstrators. Mr. Modi, 65, was elected as the prime minister last month for a term until 2017, but must win approval for his cabinet choices from the 15-member Parliamentary Board. Already, he has been blamed for failing to fulfill a promise to rebuild the country's infrastructure, and for hurting growth by curbing imports. He offered to buy farmers 100 kgs of sugar at a subsidised price of 3 rupees a kg, and this weekend he said the government would allow farmers to sell crops directly on their own terms, without paying taxes. "If it's good for business why can't it be good for agriculture," Mr. Modi said, as one of his cabinet ministers released a graphic showing that Mr. Modi's economic plans had been endorsed by the finance and agriculture ministries./* * Licensed to the Apache Software Foundation (ASF) under one * or more contributor license agreements
